

### **Company description “Bischof + Klein at a glance”**

Bischof+Klein, a German family owned company, is your partner for sustainable product protection solutions that proactively implements tomorrow’s requirements today.

As innovation leaders and market experts with over 130 years of experience, we create rather than react, and always give thought to the environment in our developments.

The global business unit “Industrial Packaging” serves main industries like chemical and petrochemicals industries, construction-, agriculture-, and food raw material industries.

As a partner to the chemicals and petrochemicals industries, our focus is on maximum safety with our leading know-how for sensitive and hazardous filling products.

Our bespoke solutions meet your most demanding requirements – in terms of reliability, function, and cost effectiveness. Besides converted sack packaging and pallet protection systems (stretchhood films), our portfolio also encompasses various form, fill, and seal systems as well as high-performance films with individually adaptable functional layers.

No matter whether you are looking for UV stability, anti-slip properties, antistatic properties, barrier functions, or batch inclusion, just let us know.
